<213> Artificial Sequence

<220>
<223> Peptide mimic of HOX Heptapeptide Region

<220>
<221> MISC_FEATURE
<222> (1)..(1)
<223> Xaa may be present or absent, is a moiety attached via the available amino group or alternatively via the side chain of the adjacent amino acid residue, is preferably a peptide of 50 amino acids or less which is optionally substituted.

<220>
<221> MISC_FEATURE
<222> (2)..(2)
<223> Xaa may be present or absent, is one or more amino acids, and is preferably W, T, PE, KQI, VV, PQT, H or RI.

<220>
<221> MISC_FEATURE
<222> (3)..(3)
<223> Xaa is an amino acids with an aromatic side chain, preferably Y, F or W.

<220>
<221> MISC_FEATURE
<222> (4)..(4)
<223> Xaa is the amino acid P or D.

<220>
<221> MISC_FEATURE
<222> (7)..(7)

<223> Xaa is an amino acid with a basic side chain, preferably K, R or H.

<220>
 <221> MISC_FEATURE
 <222> (8)..(8)
 <223> Xaa is an amino acid with a charged side chain, preferably a basic side chain, especially preferably K, R, E, H, D, N or Q.

<220>
 <221> MISC_FEATURE
 <222> (9)..(9)
 <223> Xaa is an amino acid with a charged side chain, preferably a basic side chain, especially preferably K, R, E, H, D, N or Q.

<220>
 <221> MISC_FEATURE
 <222> (10)..(10)
 <223> Xaa is an amino acid with a basic side chain or serine, especially preferably H, S, R, or K or a functionally equivalent derivative, variant or fragment thereof.

<220>
 <221> MISC_FEATURE
 <222> (11)..(11)
 <223> Xaa may be present or absent, is a moiety attached via the available carboxyl group or alternatively via the side chain of the adjacent amino acid residue, is preferably a peptide of 50 amino acids or less which is optionally substituted.
